

Pre-glued HP PVC-free wallpaper

Technical specifications:

Thickness: 177 microns
 Weight: 175 gsm
 Satin finish
 Water resistance: yes
 Fire resistance: M1
 Temperature resistance: -40°C to +90°C
 Indoor durability: 10 years

Storage: 15°C to +30°C
 Thermoformable: No

Interior use
 Washable
 No glue required
 Water-based bonding
 Easy to install

Application:

On painted walls, there's no need for glue: simply wet the back of the wallpaper
 Application temperature: between 15 and 30°C

 **Advice from mpa pro:**

No need to glue the wall!
 The glue is embedded in the back of the wallpaper, and is activated by wetting it generously with water from a sprayer.
 Recommended application temperature: +20°C

Limit of use:

Wavy or highly irregular surfaces
 Substrates that do not have a clean, smooth surface
 Materials with low cohesion between paint and substrate
 Flexible substrates
 3-dimensional surfaces (e.g. balls, pyramids)

Does not adhere to the following materials:

Leather
 Unvarnished wood
 Textile

Note: Not all FSC®-certified products are available in all regions.

Maintenance tip:

Soapy water solution
 **Caution: Do not use detergent**
